CLAIR Electronics Pvt. Ltd., is playing leading role in this culture of LED Innovation. We strive to become the global provider of intelligent environmentally – friendly LED lighting solutions for professional and consumer applications. The overall vision of the company is to provide high performance lighting solutions and significantly reduce our customers’ carbon footprint and energy demand in a way that is economically compelling and adds to their cash flow.

Due to their long life and high efficiency LEDs requires less frequently recycling than conventional light sources. In addition, with the rapid advancement in performance of LEDs, they are five times more

efficient than traditional incandescent or halogen bulbs, making them the most energy- efficient and cost effective lighting option over the system life. LEDs don't contain mercury or other hazardous materials like compact fluorescent bulbs do, so they can be handled and disposed of safely.

We believe that LEDs are the most environmentally responsible and sustainable lighting technology available. That's why we design and produce innovative LEDs lighting Solution and encourage our customers to " go green" with LED for every lighting application.

Clair Electronics Private Limited has all the LED lighting solution starts from indoor , Outdoor and Under water LED Lighting as Under :-
